

Parks for Pollinators BIOBLITZ

September 1 - 30 --- Anywhere in Elkhart County

Here's how to be a part of this national citizen science project:

- ◆ Download the free iNaturalist app onto your phone
- ◆ Create an account and join the "Parks for Pollinators 2022: Elkhart County Parks" project.
- ◆ Create new observations by snapping a photo of any plant or insect you see (within Elkhart County). No need to identify it....that is what the iNaturalist community will help with.
- ◆ Submit your observation and that's it!

Congrats! You are now an official citizen scientist.
Check out the project page to see what everyone is finding.
